

# AARNet+ Box

## CLOUD COLLABORATION AND STORAGE

Box gives faculty, staff and students the ability to access, store, and share content easily and securely – anywhere, on any device.

Box has been deployed widely across the higher education sector globally and counts among its customers an impressive list of prestigious universities. Box has been customised for the Australian research and education sector via the AARNet+ program.

Through the AARNet+ Box partnership, AARNet customers can rapidly deploy Box services to their entire organisation. How content is distributed across multiple devices and shared between internal users and external collaborators is easily managed.

Universities, TAFEs, K-12 Schools and other AARNet customer institutions are eligible to sign up for a whole-of-organisation Enterprise offering under the AARNet+ Box Agreement.t.

### Benefits

- Integration with university provisioning and security requirements
- Enterprise Customer Agreement tailored for the Australian research and education sector
- Allows individual branding by institutions

Box for AARNet is offered as part of the AARNet + program which provides a choice of 'above the network' services to meet the needs of the AARNet community. AARNet+ services leverage the high-bandwidth, low-latency, high-performing AARNet network, are competitively priced and easy for IT departments to deploy and manage.

### Features

- Online collaboration workspaces
- File sharing
- Folder layers
- iOS, Android, Mac and PC
- File commenting, group discussions and online documents
- Activity feeds for shared workspaces
- Version history
- User management
- Security controls
- Easy to use
- Box sync
- Applications included
- Single sign-on
- Annual low cost tiered plan options, based on the size of the organisation. The size encompasses the total number of staff (academic, research and general) and students.

### About AARNet+

AARNet+ is not a technical solution, it is a process that makes it easier for AARNet customers to adopt cloud services and benefit from large scale shared services. AARNet+ provides a standard process for evaluation, integration and ongoing use of cloud services.

## Quick Facts

low cost education sector pricing
