

Panopto

Video Content Management

Manage, live stream, record and share video with Panopto's easy-to-use video platform.

Used by over 600 universities worldwide, the Panopto platform makes it easy to manage video assets, integrate video into a learning management system, capture lectures, record flipped classroom videos, and much more.

Through the AARNet Panopto partnership, Panopto is hosted in Australia on the AARNet network to deliver a high-quality user experience while supporting thousands of simultaneous video streams and uploads.

Why Panopto?

- + Video content management system: a centralised, secure place for all your institution's video and audio files.
- + Recording software for lecture capture: record, edit, schedule or live stream any lecture or event, including easy multi-camera recording capability.
- + Personal recordings: on PC, Mac, iOS and Android devices for experiments, assignment assessment, demonstrations and so on.
- + Powerful search: instantly find any word spoken or mentioned in video, powerpoint or notes. Search inside videos and video library.
- + Flipped classroom: educators can easily record flipped classroom videos or experiments and publish them on many learning management systems.
- + LMS integration: tight integration with learning management systems (LMS) such as Blackboard, Canvas, Desire2Learn, Moodle and Sakai.
- + Video analytics: integration with Google Analytics and other analytics software and detailed reports on audience engagement.
- + Feature rich: screen recording, video editor, embedded interactive quiz in video

Key features

- + Hosted on AARNet servers within Australia: content replicated across geographically distributed datacentres and backed up nightly.
- + Secure: SSL encrypted traffic, firewall protection, DDoS mitigation, BCP38 protection, 24/7 monitoring, access is limited and logged.
- + Traffic is on-net: super-fast upload/download or streaming of videos for AARNet-connected institutions.
- + Cost effective storage and archiving of video content.
- + AARNet support: Tier 2 support provided by AARNet.

What our customers say

“Panopto enables CSU to provide a high-quality lecture capture service for students and staff. With exceptional video content management, Panopto is a centralised secure place for recorded lectures, flipped classroom videos and more. Key features including ease of use, analytics and enhanced search capability, as well as integration with CSU's Blackboard LMS, deliver a seamless experience for staff and students.”

Tim Mannes - Executive Director, Information Technology, Charles Sturt University

About AARNet Cloud Services

We make it easier for AARNet customers to adopt cloud services and benefit from large scale shared services by providing a standard process for evaluation, integration and ongoing use of cloud services.

AARNet builds partnerships with providers that are willing to customise their offerings to better meet the needs of the research and education community.
